Coimbatore - TAMILNADU
INDIA

SKILLS

Frontend

React.js, Next.js, React Native, Tailwind CSS, Redux, React hooks, Context API

Backend

Node.js, Express.js, GraphQL, REST APIs, MongoDB

Languages

TypeScript, JavaScript, HTML5, CSS3

AI & Tools

Gen AI, LLM, RAG, Vector DB, Git, Webpack, Vite

CERTIFICATIONS

- GenAI for Front-End Developers – Coursera
- ChatGPT Prompt Engineering for developers – OpenAI & DeepLearning.AI
- Claude code in Action – Coursera

EDUCATION

M.Sc. Computer Science (Integrated PG)

College of Engineering, Guindy
Anna University Chennai

2008 – 2013 | CGPA: 8.6 / 10

PROFESSIONAL SUMMARY

Motivated Full Stack Engineer with 12+ years of expertise in React, Next.js, Node.js, React Native, and cloud architecture, building scalable web and AI-powered platforms that reduced regression defects by 40% and accelerated release cycles.

KEY ACHIEVEMENTS

- ✓ Integrated Gemini API & Supabase to build an AI resume assistant
- ✓ Architected a scalable full stack AI workspace platform
- ✓ Reduced page load time by 30% through frontend performance optimization
- ✓ Implemented automation test to reduce regression defects by 30%

FEATURED PROJECTS

AI Resume Assistant

Next.js + Gemini

AI-powered interactive resume featuring a conversational chatbot trained on resume data to help recruiters learn about the candidate.

AI workspace

React + Node.js

AI-driven workspace leveraging RAG for document analysis and data insights, semantic search, and conversational interactions

Finance Data Hub

React Native + TypeScript

An executive AI-powered mobile analytics platform enabling financial KPI drill-down insights, and reducing regression defects by 30% through Appium CI automation.

○ EXPERIENCE

Walmart Global Tech India

Remote

Software Engineer III | 2020 – Present

- Led the development of production-style AI workflows combining LLMs with vector search and structured querying to improve accuracy and reduce hallucinations.
- Leading frontend development for mobile and web-based enterprise analytics platforms using React, React Native, JavaScript, and TypeScript, with integrated AI-based data analytics capabilities for intelligent insights and enhanced user experiences.
- Integrated Appium-based automation into CI pipeline, reducing regression defects by 30%.
- Architected scalable Redux-based state management for KPI-driven executive dashboards.
- Collaborated with product, QA, and backend teams in Agile sprints to deliver high-impact financial insights tools.

Gogo Inc.

Chennai

Frontend Engineer III | 2020 – Present

- Built high-performance AG Grid-based data visualization modules handling multi-year financial datasets
- Implemented Cypress automation in CI/CD, reducing manual QA effort and accelerating release cycles
- Contributed to React migration and component-driven architecture adoption across teams

IBM India Pvt. Ltd.

Chennai

Senior Software Engineer | Aug 2013 – Apr 2019

- Mentored junior developers and guided adoption of best practices in architecture and state management.
- Delivered automation and analytics platforms reducing manual validation effort by 40% (30+ hours/week saved).
- Built change management portals eliminating Excel-based workflows across projects.
- Led UI modernization initiatives including Mainframe-to-Angular migration POC.
- Developed Node.js-based tools to streamline release and approval processes.

○ PROJECTS

AI Resume Assistant (LLM + RAG) | 2026 – Present

- Developed an AI-powered interactive resume platform enabling recruiters to explore candidate experience through conversational interactions
- Built a resume-trained chatbot capable of answering questions about skills, projects, achievements, and work experience
- Designed RAG-based retrieval pipeline to generate grounded and accurate responses from resume data
- Integrated streaming AI responses for a real-time conversational experience
- Deployed scalable full stack architecture with cloud-hosted frontend and backend services

Next.js TypeScript RAG Gemini API Supabase Tailwind CSS

AI Workspace (LLM + RAG) | 2026 – Present

- Led the design and development of a full-stack AI-powered workspace enabling chat, semantic search, document analysis, and data insights using LLMs and Retrieval-Augmented Generation (RAG).
- Developed hybrid and vector-based semantic search using embeddings, ChromaDB, keyword ranking, and AI suggestions to improve autocomplete relevance and context-aware retrieval.
- Designed a RAG pipeline with chunking, embedding generation, and similarity-based retrieval for grounded responses.
- Integrated streaming responses and context management for real-time conversational experience.
- Built structured data insights modules using SQLite and LLM-powered natural language querying.

Finance Data Hub – Mobile Analytics Platform | 2024 – Present

- Built executive mobile AI-based data analytics app for intelligent insights analytics enabling region/market drill-down analysis of financial KPIs.
- Implemented user specific KPI watchlists.
- Reduced regression defects by 30% via Appium automation in CI.
- Stack: React Native, TypeScript, GraphQL, Redux, Jest, Appium, AI data insights.

React Native

AI data insights

Sam's Club – Financial Reporting System | 2020 – 2023

- Developed P&L visualization platform supporting annual budgeting and long-range planning.
- Implemented AG Grid-based dynamic financial reports for multi-region analysis.
- Integrated Cypress tests into CI/CD, accelerating release validation.

React.js

JavaScript

Redux

AG Grid

Material UI

Jest

Kubernetes

Annual Operating Plan – Financial Reporting System | 2020 – 2022

- Developed P&L visualization platform for 200+ executives supporting annual budgeting and long-range planning.
- Implemented AG Grid-based dynamic financial reports for multi-region analysis.
- Integrated Cypress tests into CI/CD, accelerating release validation.
- Delivered real-time sales and P&L insights, accelerating decision-making by 30%.
- Reduced manual analysis effort by 35% through automated dashboards and reporting.

React.js

JavaScript

Redux

AG Grid

Material UI

Jest

Kubernetes

Customer Account Management Portal | 2019 – 2020

- Built a secure customer portal for managing passes, visas, subscriptions, and account settings.
- Implemented Google reCAPTCHA v3 authentication, strengthening login security and reducing support dependency.

Vue.js

Axios

SCSS

Google reCaptcha3

Cypress

BDD

AWS

IFE (In-Flight Entertainment) | 2019

- Developed a unified UI platform for multi-airline IFE systems using a single reusable layout.
- Enabled airline-specific theming via a centralized theme server, ensuring consistency while supporting customization across carriers.

React.js

Axios

Redux

Styled Components

AWS

Delivery Interlock Portal | 2017

- Developed a complete Change Management portal to lock project releases, streamline project access and approvals, automate manual tasks, and generate reports—eliminating Excel-based data exchange.

Node.js

Express.js

jQuery

HTML5

Bootstrap3

MongoDB

Continuous Service Improvement Ideas Portal | 2015

- Developed a site to manage improvement ideas, eliminating manual data validation, report generation, and Excel-based workflows.
